

## **Examples of Discovery Clauses**

### Example 1.

It should be noted, however, that despite the present survey, the possibility of undiscovered archaeological sites exists within the project area. Upon earth moving activities, if such discoveries are made, please notify the tribal government who, in turn, should notify the BIA and the Tribal Historic Preservation Office and/or State Historic Preservation Office. If human remains are uncovered, suspend activities immediately and notify the tribal government and BIA. If you believe the human remains may be from a recent death, contact the local law enforcement agency as well.

### Example 2.

If any previously unknown sites are inadvertently discovered during the course of operations, activity will cease in the vicinity of the discovery until the Secretary of Interior and Tribes' representatives evaluate the discovery and determine appropriate mitigative measures.

In compliance with the Native American Graves Protection and Repatriation Act (25 U.S.C 3001), if any human remains are inadvertently discovered during operations, activity will cease in the vicinity of the discovery and the appropriate tribal representative will be contacted in order to determine the appropriate course of action as specified in 43 CFR 10.4.
